

University of Colombo School of Computing
SCS2312 Computational Models and
Programming Language Concepts
Tutorial – 02

- 01** Design a Turing Machine which recognize the language $L = 0^*1^*0$
- 02** Design a Turing Machine which recognize the language $L = \{ 0^n 1^n \mid n \geq 1 \}$
- 03** Design a Turing Machine which recognize the language $L = \{ a^n b^n c^n \mid n \geq 1 \}$
- 04** Design a Turing Machine for adding of two numbers $2+3=5$
- 05** Design a Turing Machine for Even Palindrome $\Sigma=\{a,b\}$ ex : abaaba
- 06** Design a Turing Machine for multiplication of two numbers $2*3=6$
- 07** Design a Turing Machine for Subtraction and division of two numbers
- 08** Design a Turing Machine for converting unary to binary
- 09** Design a Turing Machine for comparing two unary numbers
- 10** Design a Turing Machine for sorting set of numbers *
